Week 2 Class 2 — Prompt Systems

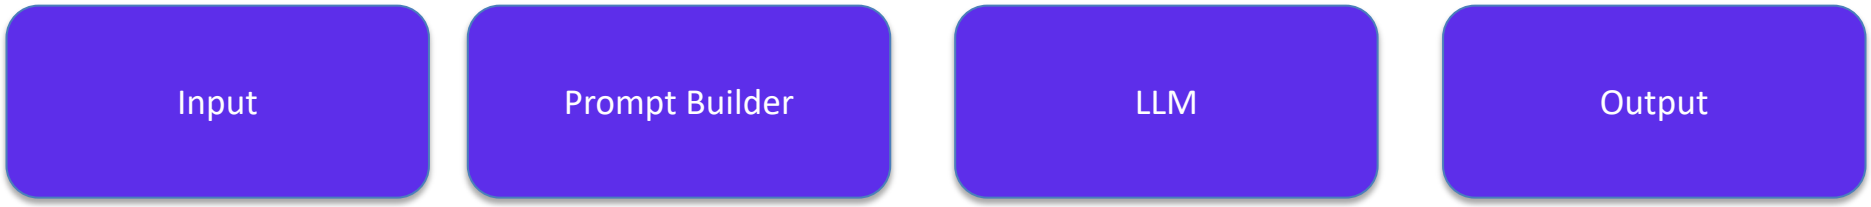
From Prompt Engineering → Prompt Systems

Control model behavior BEFORE generation

Focus: pipelines, refinement, guardrails

Prompt = Program

Prompt Pipeline



Moment

We are not calling AI — we are orchestrating it

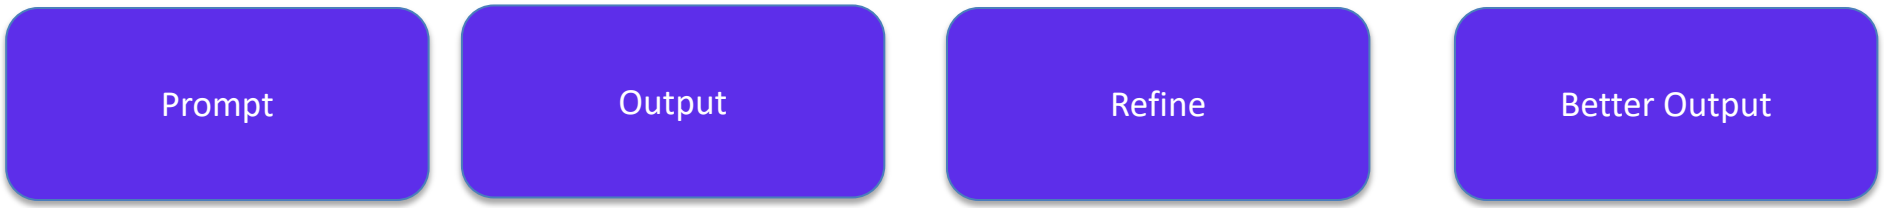
Prompt Refinement Loop

First output is rarely perfect

We use AI to improve AI

Iterative system design

Refinement Loop



Moment

AI fixes AI

Guardrails

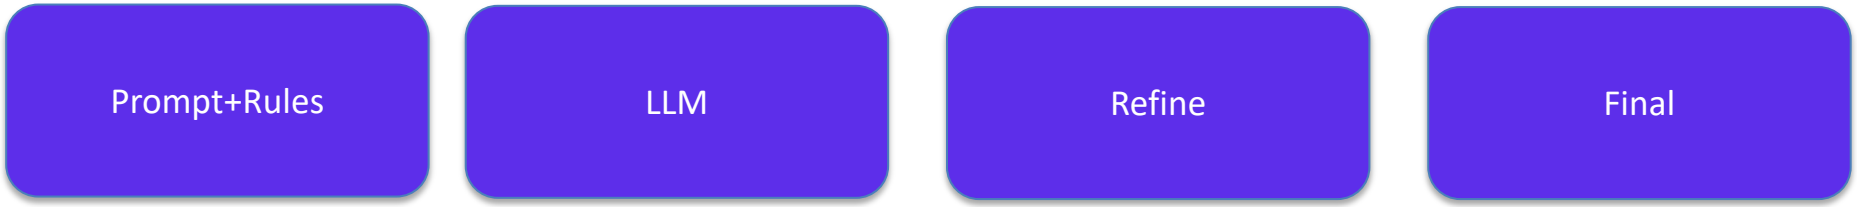
Restrict model behavior

Reduce randomness

Increase reliability

Define structure, tone, limits

Full System



Moment

AI = System, not API call
